

## **Cleanfield Energy Announces a Distribution Agreement Encompassing Projected Sales of 3,000 Units Over 36 Month Period**

### **FOR IMMEDIATE RELEASE**

**Ancaster, February 13, 2008** – Cleanfield Alternative Energy Inc. (“Cleanfield”) (TSXV: AIR) is pleased to announce that its fully-owned subsidiary, Cleanfield Energy Corp., has entered into a non-exclusive distribution agreement with Two-West Energy Group (“Two-West”) of Ontario as of February 13, 2008 (“the Agreement”).

Two-West will market, sell and install Cleanfield’s V3.5 wind turbine to specified client accounts within Canada and the United States. The aforementioned client accounts include high-profile customers within the following industries: automotive, food services, retail, real estate, and grocery.

Pursuant to the terms of this three-year Agreement, if full distribution of the Agreement is achieved, with sales projected at 3,000 units, a further three year renewal will be granted to Two-West. Installations of Cleanfield’s V3.5 by Two-West are anticipated to commence within four months. This Agreement replaces the previous Letter of Intent between Cleanfield and Two-West (formerly “ESG”) for 500 units dated November 6, 2007.

Two-West is eligible to receive incentive aggregate common shares based on sales. Within the first 18 months of the Agreement, should Two-West sell between 500 and 649 Cleanfield V3.5 turbines, they are eligible for the transfer of an aggregate 300,000 common shares from Cleanfield’s co-founders; this will increase by 100,000 if 650 to 799 sales occur. The aggregate common shares are subject to resale restrictions with 50% being tradable 6 months following, a further 25% becoming freely tradable 12 months following, and an additional 25% becoming freely tradable 18 months from the date of transfer. Furthermore, should sales exceed 800 units within 18 months, Cleanfield shall issue to Two-West an additional 100,000 common shares from treasury, subject to the same resale restrictions as the aforementioned incentive, and for every additional 160 turbines sold by Two-West over and above 800, Cleanfield shall issue an additional 50,000 shares; such shares will become freely tradable on a date that is 12 months from the date of issuance. Cleanfield will have no obligation to issue any additional shares above 1,000,000 in the capital of the Company either from treasury or from the co-founders.

This Agreement has the potential to engender a significant increase to the small wind turbine industry. According to the *American Wind Energy Association’s 2007 Small Wind Turbine Global Wind Market Study*, 741 on-grid (connected to the utility grid) small wind turbines were sold in the United States<sup>1</sup> in 2006. The primary target market for Cleanfield’s V3.5 wind turbine is on-grid. Following the implementation of this Agreement, the number of installed on-grid small wind turbines could increase by 135% over those installed in 2006.<sup>2</sup> This could allow Cleanfield to potentially become one of the market leaders in this fast growing sector. As noted by the *American Wind Energy Association’s Study*, since 1990, the small wind turbine market has enjoyed an annual growth of 14-25%.

Cleanfield’s President and Chief Executive Officer, Mr. Tony Verrelli, observes that, “This agreement is an important step for Cleanfield as the product will become more visible to the corporate sphere.

<sup>2</sup> 2007 figures were not available at the time of this Press Release.

Concern for the environment is increasingly important, and corporate customers will benefit with installations of the Cleanfield V3.5 as it serves to become their icon of commitment to reducing Greenhouse Gases and generating green electricity for the future. Cleanfield's agreement with Two-West is a great complement to our existing growing network of professional dealers and distributors across North America."

Mr. Jerry Foster, Director of Sales and Marketing of Two-West, states that, "Our group is excited for the opportunity to bring the Cleanfield V3.5 to market. Corporations can surely benefit from the efficient wind turbine offered by Cleanfield Energy, and we look forward to introducing our diverse network of business associates to the product."

### **About Two-West Energy Group**

Two-West Energy Group is headed by an award-winning business development team with a keen ability to marry customer requirements with corporate goals. They are experienced team players in the areas of visual communications, business development, strategic sales implementation and corporate finance.
