

## **Cleanfield Energy™ Announces the First High School Rooftop Wind Turbine Installation**

### **FOR IMMEDIATE RELEASE**

**ANCASTER, ONTARIO (December 1, 2008)** - Cleanfield Energy™ Corp. ("Cleanfield") a subsidiary of Cleanfield Alternative Energy Inc. (TSX:AIR) announces that it has installed its V3.5 Vertical Axis Wind Turbine on Elliot Lake Secondary School located in Northern Ontario.

In addition to being Cleanfield's first high school rooftop installation, it also represents an environmental initiative taken by the staff and students at the school. Cleanfield Energy™ joined staff, students, dignitaries, and the Mayor of Elliot Lake in the school's gymnasium recently to officially recognize and celebrate the secondary school's efforts and "green" stewardship.

Cleanfield's CEO Tony Verrelli, commented that "...more than just offsetting the school's electrical demands, the turbine installation provides staff and students with the opportunity to be up close and to experience the turbine in motion and study its operation and data output. Current and future students will gain valuable knowledge of the turbine, which could result in forthcoming new green technology products."

### **About Cleanfield Alternative Energy Inc.**

Cleanfield Alternative Energy Inc. is the parent company of Cleanfield Energy Corp. and is committed to the development of renewable energy products for both consumer and commercial applications. Cleanfield's tailor-made Vertical Axis Wind Turbine can be mounted on a tower or suitable rooftop, offering electricity independence and security.
